Mobile Waste Sheet

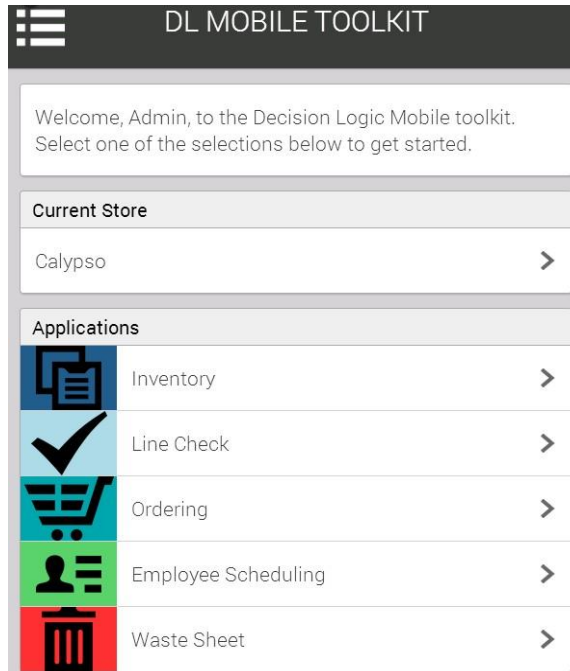

V 3.16

This information/data contained on this document may not be applicable and/or may vary from your Decision Logic site. Changes are periodically made to the information contained herein in the form of updates and/or new editions upon release

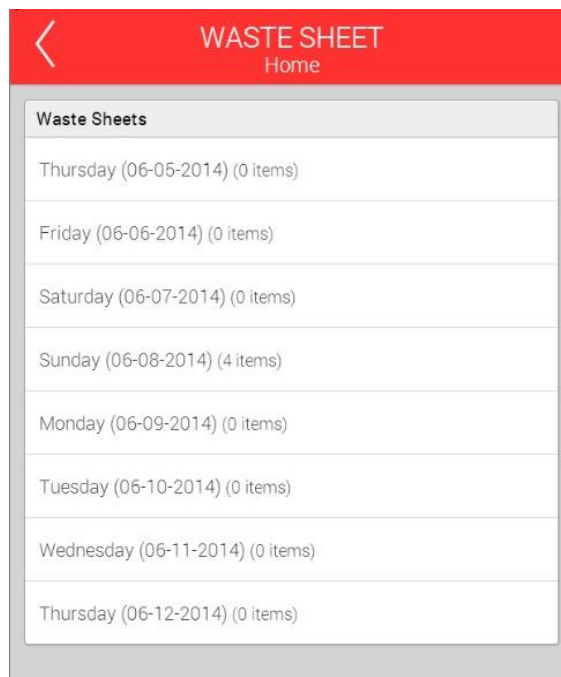

Mobile Waste Sheet

Waste sheet app has been put in place for managers to record waste by ingredient or menu item.

1. Log into the DL Mobile Toolkit and select Waste Sheet.

2. Select the proper date to enter wasted item.

This information/data contained on this document may not be applicable and/or may vary from your Decision Logic site. Changes are periodically made to the information contained herein in the form of updates and/or new editions upon release

3. Determine if the item wasted is a menu item or an ingredient.
4. Select Add new ingredient or menu item.
5. Search for the item wasted by entering name in the search box and selecting enter or search

chicken	Search	
Chicken 1/2 ID#858		
Chicken Filet ID#164		
Chicken Filet - Chef Base ID#446		
Chicken Filet - Slacked ID#447		
Chicken Fried Chicken ID#869		
Chicken Rdm - Prepped RAW ID#443		

6. Select Item wasted
7. Enter the reason for the item being wasted, the quantity wasted and any comments that are related.
 - a. QTY can be entered by the recipe value or the inventory value.
 - i. Recipe value can be used when quantity wasted is smaller than a case.
 - ii. Inventory value can be used when quantity wasted is a case or more.
